

Timely Warning Notification Form

The Long Island Business Institute campus security plan provides for immediate action in the event of imminent danger through cell phone message notification.

In the event of a catastrophic emergency, or a dangerous situation that threatens the safety and well-being of the members of the college community, LIBI will issue a warning message to the cell phones of all participating individuals.

You will also receive a second message notifying you that the college has resumed normal operations and that the emergency conditions no longer exist.

If you decline to participate in this notification system, a message will be sent to your LIBI e-mail advising you of the emergency and how to proceed.

By signing your name, you agree to provide LIBI's Timely Warning Notification System with your most current cell phone number. Timely Warnings are ONLY sent by SMS to your cell phone in case of dangerous situations at our campus and are meant to keep you from any dangerous activity that is occurring at the campus.

I Agree

I Decline

To receive timely warning message to my cell phone in case of an emergency situation.
